

INSTRUCTIONS AND WARRANTY

Model WT-3

Wet Tunes™ The Shower Radio

Congratulations! You are the proud owner of the Salton Wet Tunes™ radio. To obtain maximum satisfaction and enjoyment, please follow these simple guidelines.

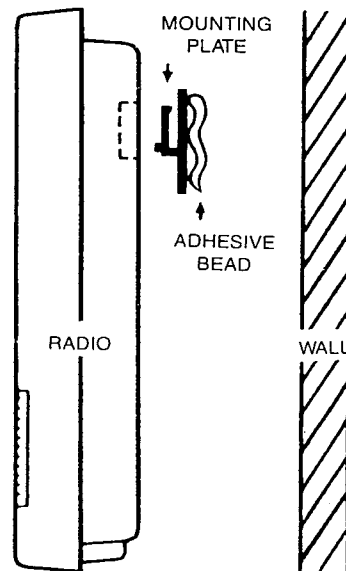

1. Do not submerge the radio in water. It is water resistant, not waterproof.

2. **SIGNAL RECEPTION:** Turn on the radio and move it around to various locations and positions on the wall to determine a suitable location that provides good reception.

Avoid locations that lie directly in the path of the shower stream.

WALL MOUNTING

- a. Select a spot on the wall that is as smooth as possible such as smooth ceramic tile. Thoroughly clean the spot of all soap, oil or other films using a household cleaning solvent such as Acetone or nail polish remover. **DO NOT** use tile cleaner or other waxed-based substances. Allow area to dry completely. Room temperature should be at 60 to 70 degrees Fahrenheit.
- b. For best results, hold adhesive tube (supplied in package) at a 45-degree angle and apply sealant to mounting plate approximately 1/8" bead and 1/4" from edges. Use entire content.
- c. Place mounting plate against cleaned wall surface, using enough pressure to displace air, but not adhesive.

550 Business Center Drive,
Kensington Center,
Mt. Prospect, IL 60056
