8. Do not put the Toaster Oven-Broiler, cord or plug in water.
9. When you are ready to use the Toaster Oven-Broiler, plug the cord into a 120V AC outlet.
10. To eliminate any protective substance or oil that may have been used for packing and shipping, turn the Function Control to TOAST and set the Timer Control for 15 minutes. A small amount of smoke and odor may be detected. This is normal.
11. To avoid scratching, marring, or discoloration, do not store anything on top of the Toaster Oven-Broiler during operation.

CAUTION: Appliance surfaces are hot during and after use.

CAUTION: Always wear protective, insulated oven mitts on hands when touching hot Toaster Oven-Broiler or hot dishes and food or when inserting or removing Wire Rack, baking dish and food.

NOTE: After using the Toaster Oven, turn the Temperature Control to the lowest position, turn the Function Control OFF, turn the Timer Control to OFF; then remove plug from wall outlet.

HINTS FOR BEST RESULTS

- To prevent heat loss, avoid opening the door excessively.
- To speed up browning, brush lean cuts of meat, chicken and fish with oil, margarine or melted butter.

COOKING CONTAINERS

- The Bake/Broil Pan included with the Toaster Oven-Broiler is suitable for items such as cookies, rolls, biscuits, nachos and pork chops.
- A variety of standard baking dishes, such as an 8" round or square cake pan, a 6-cup muffin pan, and 1 & 2 quart round, square, or rectangular casserole dish may be used for foods other than those listed above.
- Choose bakeware made of metal, or glass/ceramic without lids.
- Dark or dull pans absorb heat faster; foods will bake more rapidly and crust will brown more easily than in shiny bake pans.
- Check package directions and/or with the ovenware manufacturer to determine if the container is suitable for use in a Toaster Oven-Broiler.
- Do not use oven roasting bags in this Toaster Oven-Broiler, as they may come in contact with the Heating Elements.

CAUTION: Allow at least 1" air space between the top of the container and the Upper Heating Elements. Never use glass lids on glass or metal bakeware. If a lid is necessary, cover tightly with heavy-duty aluminum foil.

- Frozen and heavy bread require a longer time setting (e.g. bagels and English muffins).

NOTE: Use extra caution when using this Toaster Oven-Broiler for toasting pastry items with runny-type frosting or open fillings.

- When toasting more than one slice of bread, use slices of similar size, thickness and freshness.
- One slice of bread requires a lighter setting than several slices of bread.

- Different breads require different toasting times. Turn Timer Control to the OFF position and open the Glass Door to check toast color. Close Glass Door and reset Timer Control if more toasting time is needed.
- For best results, clean Crumb Tray frequently.

- Food may cook faster than recipe or package time. Check for doneness prior to end of cook time.
- Rotate and turn food over for more even browning halfway through the cooking process.
- To prevent heat loss, avoid opening the Glass Door excessively.
- For best results, foods that contain a leavening agent should be baked on the lowest Shelf Position #4 of the Toaster Oven-Broiler.

INSTRUCTIONS FOR BROILING

Only the Upper Heating Elements will heat when this Toaster Oven-BROIL Function is used.

1. Plug into 120 V AC 60 Hz outlet. Close the Glass Door.

7. Turn the Function Control to BROIL.
8. Turn the 30 Minute Timer to the desired time. The Indicator Light will illuminate.
