**Cleans Plaque From Teeth and Gums**

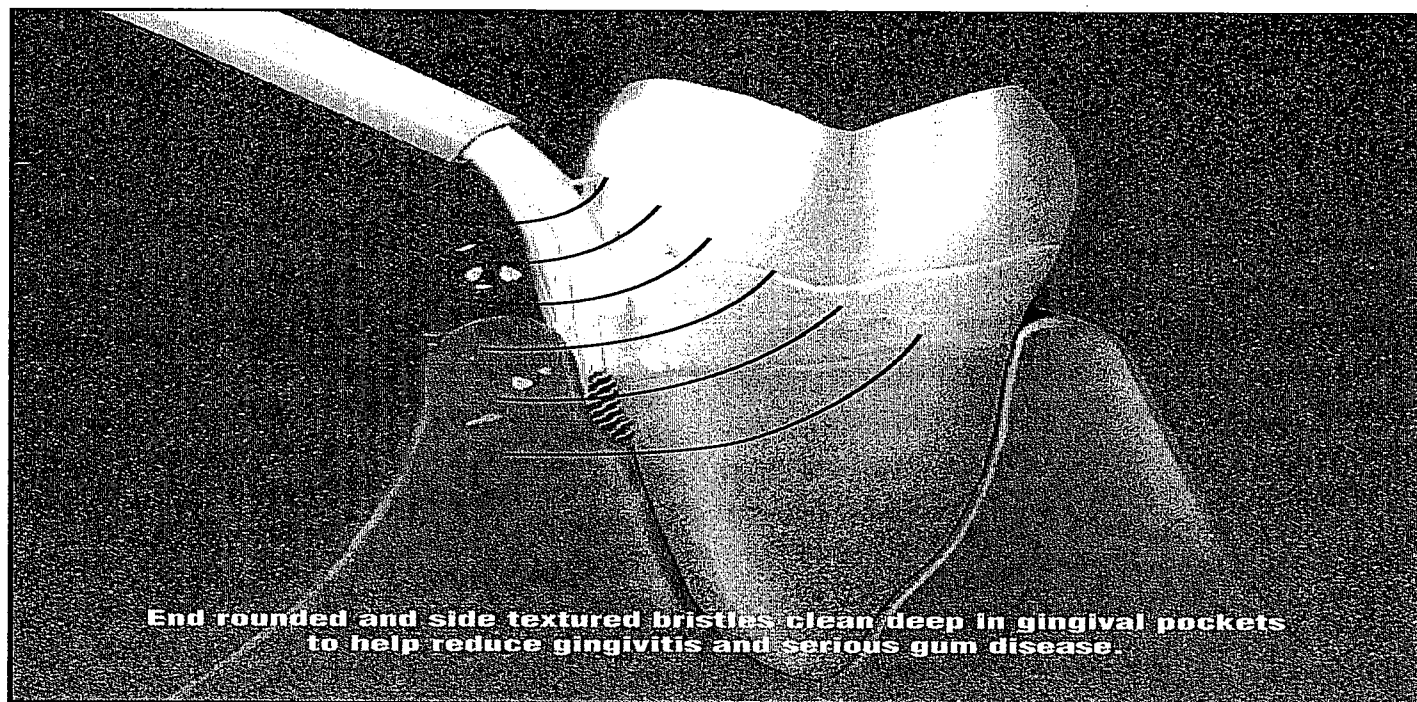

# The Automatic Flosser For People Who Hate To Floss

Your dentist recommends flossing once a day. Daily removal of bacterial plaque between teeth and under the gum line is crucial in preventing gum disease. But string floss can be difficult and uncomfortable to use. So you don't floss as often as you should. Until now.

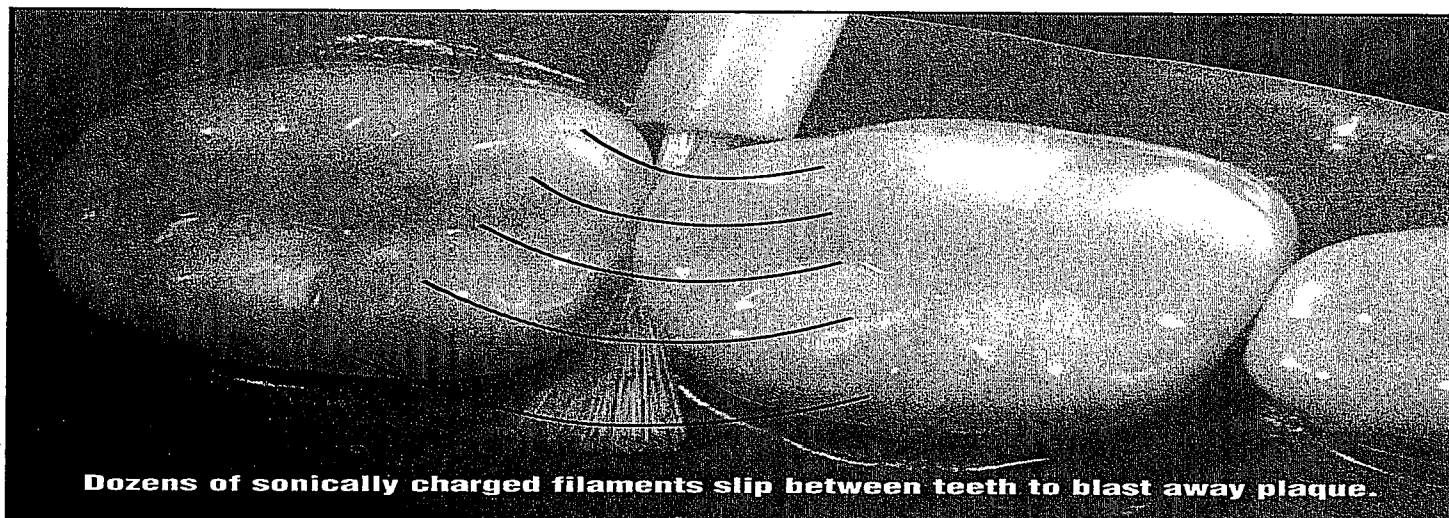

Introducing the SoniPick™ interdental plaque remover, an amazing alternative to traditional dental floss that you'll want to use every day. The SoniPick is an automatic flosser that's as easy to use as a toothbrush and many times more effective than your old dental floss.

## **Effectively Cleans Deep Into Gingival Pockets**

The slender filaments of the SoniPick even cleans plaque deep in gingival pockets. These pockets are the space between your teeth and gums where plaque hides, creating a perfect breeding ground for the bacteria which cause gingivitis and even more serious gum disease, including tooth loss. Unlike string floss, the SoniPick penetrates the facial and lingual pockets to clean the most stubborn plaque from its deepest hiding places.

SoniPick cleans with a single tuft of tiny toothbrush filaments which vibrate sonically at a speed of 18,000 strokes per minute. These sonically-charged filaments slide between your teeth — even those really tight spots — to blast out plaque. You'll feel the satisfaction of finally flossing as the doctor ordered — but effortlessly.

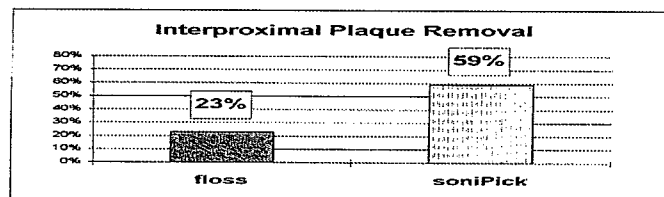

**Dozens of sonically charged filaments slip between teeth to blast away plaque.**

## **You Won't Believe How Much Plaque You've Been Missing**

The SoniPick is the ideal dental flosser for nearly everyone — especially those with implants, braces, bridgework, any kind of dental work. It reaches deep into the gaps where other type of flossers simply can't reach. When you floss with the SoniPick, dozens of sonically charged nylon filaments reach deep between teeth, under the gum line and around dental work to seek out plaque and blast it from your mouth. You're left with a feeling of refreshingly clean. Effortlessly!

**Clinical Study proves that soniPick™ removes twice as much interproximal plaque as string floss.**

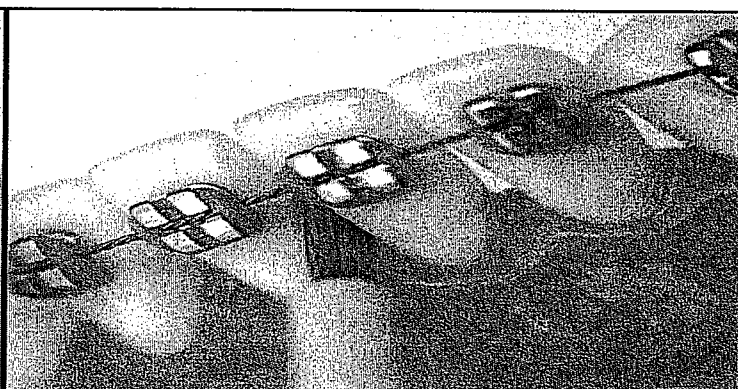

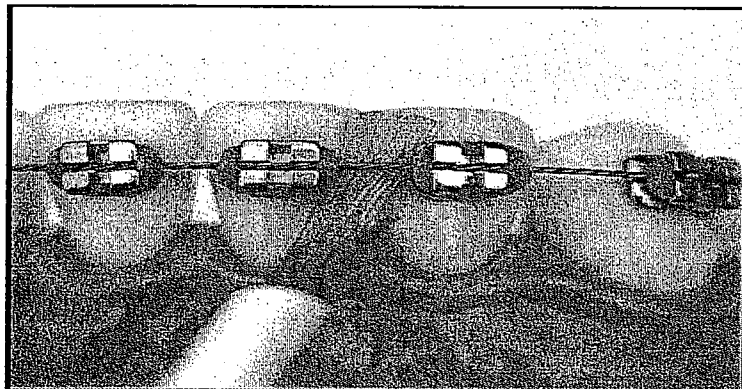

Split mouth, Paired Comparison,  $p < 0.0005$

## **Safe and Easy To Use**

The ergonomically designed and lightweight SoniPick easily and comfortably allows you to reach all areas of your mouth — even between those hard to reach back teeth. The bristles are made of nylon. They are End-Rounded for safety and Side-Textured for increased cleaning effectiveness.

The SoniPick runs on one AA battery and comes with a convenient storage stand. Your SoniPick also comes with 30 disposable cleaning tips in three sizes — thin, medium and thick — so you can decide for yourself which is most comfortable for you.

# Experience The **soniPick™** Professional Clean Feeling For Yourself!

**Try soniPick™ Risk-Free For 30 Days.**

We guarantee that you will be amazed how easy, convenient, and effective flossing can be the soniPick™ way. No Dexterity Required!
